

## Safe Use and Care Guide

- The WOW-Walk On Water is designed to be used in a large body of water with a minimum depth of 10 to 12 feet. Place it in an area away from boat traffic and free of obstructions, including but not limited to, weeds, logs, sandbars, rocks or other objects. Do not use on land or in swimming pools.
- This product is to be used for recreational purposes only. Use of this product involves inherent risks of personal injury. This product does not have any braking or steering devices. Persons who use this product assume all risk of injury.
- The WOW-Walk On Water should never be towed, pushed or pulled by any type of watercraft. Towing the pad is dangerous and could also cause damage to the foam pad.
- Once you find the ideal, safe location to place your WOW-Walk On Water, attach the elastic-lead directly to your own mooring or anchor. If you plan to leave the WOW-Walk On Water in the water for an extended period of time during the day, we highly recommend attaching a highly-visible buoy and/or flags to the WOW-Walk On Water.
- The WOW-Walk On Water is not intended as a flotation device for poor swimmers – it is recommended that all users wear an approved US Coast Guard personal flotation device (PFD) life vest before entering the water.
- Use common sense. Do not allow horseplay.
- Children should be under adult supervision at all times.
- Never use the WOW-Walk On Water while under the influence of alcohol or drugs.
- Never use the WOW-Walk On Water while tired or fatigued. Use extreme caution while swimming between the shore and the WOW-Walk On Water. Do not attempt to swim this distance if you are tired or fatigued
- Use the WOW-Walk On Water only under mature adult supervision. Never enter the water or play on the WOW-Walk On Water alone.
- Do not swim or play under the WOW-Walk On Water. Do not dive from the WOW-Walk On Water.
- Never use in stormy weather or after dark.
- Inspect pad, tethers, elastic cords, anchors and hardware before each use.
- If the WOW-Walk On Water is anchored, precautions should be taken to eliminate activities that could cause entanglement in the rope and/or anchoring device.
- The WOW-Walk On Water should always be kept visible on the water. Even though the pad is brightly colored, additional visibility such as buoys and/or flags may be needed. Never store or use the WOW-Walk On Water in the water during low light conditions such as storms or non daylight hours.
- Always secure the WOW-Walk On Water from unauthorized or unsupervised use. Remove the WOW-Walk On Water from the water when not in use to avoid unsupervised or unauthorized use. Do not leave on the water year round.

## CARE AND MAINTENANCE

The WOW-Walk On Water is made from cross-linked polyethylene foam and does not require any other flotation device or air, so set up and maintenance are simple.

Wipe off any foreign materials that could scuff or tear the surface.

As with all products, to protect the surface skin and color, it is recommended to reduce exposure to direct UV sun light for extended periods of time. UV rays are damaging to the surface and could cause fading and hazing of the surface if left in sunlight for weeks at a time. To prolong the life and look of your WOW-Walk On Water it needs to be kept dry and protected from direct sunlight when not in use.

For long storage periods, remove your WOW-Walk On Water from the water and let dry, then roll using the Velcro straps. Store in a location protected from the elements away from the shore.
